1. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or fairly suggest a mold clamping device having split nut tie bar connecting means that detachably connects each of the tie bars to the movable platen, and a mold clamping cylinder provided around a tie bar insertion through hole in the movable platen and using the split nut as a reaction point, the mold clamping cylinder including a primary piston that abuts against the split nut, the primary piston defining front and rear chambers, and a secondary piston in the primary piston chamber positioned on the stationary platen side, the secondary piston defining the stationary platen side chamber into a front chamber and a rear chamber, wherein the secondary piston integrally operates with the primary piston during mold contact and mold clamping but moves relative to the primary piston during mold release, as claimed in claim 1. The prior art of record does not teach or fairly suggest a molding method using such a mold clamping device, as claimed in claim 3.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
